EXPLORER

FREEDOM

Ecuánros started operations in 1997, on 10 acres of the best land given its geographic location. To achieve a constant and steady growth exporting roses of the finest quality was very manageable, given the great conditions of water, soil, lighting and altitude of the area where the farm got placed, thus delivering a premium quality product all along its history.

All these great conditions, merged with a committed, reliable and well trained staff constitute a solid ground upon we have built our strong reputation and brand positioning in every market over the years.

We strongly believe in building long term relationships with our customers, which has enabled us to bring them a constant feel of evolution and attainment of excellence through time, meeting their highest standards with our roses and our service.

This makes us a stable and reliable partner in our customers' business ensuring top quality product and meeting their needs for roses every time.

After 20 years in the industry, Ecuánros has grown to become a beautiful 220 acres farm with a little over 80 varieties and constantly renewing our product and improving our processes under strict regulations, always environmentally friendly and socially conscious.

We contribute and collaborate with our neighboring communities by not only providing stable jobs year after year, but also, cooperating with important initiatives involving local development programs.

We invite you to get to know us and our product... experience our service and the beauty of our roses, which we are sure will become your favorite....

Sincerely,
ECUANROS
